The Arundel Castle Archive Catalogues have been electronically scanned, a process which resulted in mysterious changes to some of the characters, e.g. the letters ‘r’ and ‘n’ when occurring together were sometimes changed into the letter ‘m’, fractions are often not recognised, the letter H and the £ signs sometimes become #. Every effort has been made to correct such things, but researchers should be aware that some anomalies may remain. If in doubt about any of the entries, or if you come across and can clarify anything we have missed, please contact a member of the Archive team at Arundel Castle.

Information in the catalogues which has been found to be incorrect is indicated by striking through, and any additional information appears throughout the catalogues inside square brackets and in red.

N.B. When using the Index, researchers should be aware that the page numbers refer to those at the bottom of the (original) catalogue page and NOT to the computer generated page numbering.

Document references must include the letter reference (highlighted at the top of the page) as well as the number.

PREFACE

The issue of this first volume of interim handlists of selected groups of records at Arundel Castle calls for an explanation. The quantity of documents at the Castle is so great and their arrangement was so disorderly after the addition of further large consignments from Norfolk House that the whole collection had to be re-sorted. As the work proceeded, it became evident that none of these archives would be accessible to scholars unless certain groups, even if eventually found to be incomplete, were finally listed and numbered. This course of action also helped to reduce the sheer bulk of records carrying only temporary catalogue marks and gave much-needed room to manoeuvre. The original plan was to issue separate handlists devoted to each principal class of archive, but it soon became obvious that such lists required indexes if they were to be really useful. It was therefore decided to wait until eleven lists were compiled and, with an index to them all as list no. 12, to offer a sizable book. A catalogue of the Earl Marshal’s papers was published by the Harleian Society in 1964; the archives of the Duke of Norfolk’s Yorkshire, Notting-hamshire and Derbyshire estates are the subject of a catalogue published by the Libraries and Arts Committee of the Corporation of Sheffield in 1965.

It is planned to issue further volumes in fairly quick succession of certain other large classes of the Arundel Castle archives: these will deal with (a) accounts (some 1,400 items); (b) miscellaneous documents (about 1,200 groups); (c) title-deeds (approximately 10,000 documents). Then will follow lists of court rolls and a full catalogue of the extensive papers of the first and second Lord Lyons. When these groups are completed, the remainder of the records at Arundel should not present too great a problem. As catalogue entries for stray documents are merged into the master, interleaved, copy of the lists now printed, and in those to be printed, it will be a relatively simple matter to reprint all these interim handlists, with a comprehensive index, in as many volumes as may be necessary. The scheme outlined above will mean that a continually increasing quantity of archives will become available at intervals instead of scholars having to wait until the entire collection is processed.

While the number of records involved is hard to estimate, it may be claimed that Arundel Castle houses one of the largest and most complex collections in the country. I have written elsewhere about some of the problems attached to the sorting and listing of such a vast accumulation of archives and I can only repeat that scholars must continue to be patient.

The access to records at Arundel is restricted even if catalogues are in print. Accredited students should apply in the first instance to the County Record Office at Beverley.

1 Except the estates in the East Riding, the archives of which are deposited in the County Record Office at Beverley.
2 Their publication will not necessarily be in the order they are mentioned above.
Archivist of West Sussex for permission to use any of the documents, but it must be clearly understood (i) that access will not be given to uncatalogued material; (ii) that students will have to fit in with such attendances as the County Archivist is able to make at Arundel; (iii) that certain classes of records (e.g., the correspondence of the 15th Duke of Norfolk, and documents of fairly recent date) are not open to inspection; (iv) that access to any document may be refused. Arundel Castle is still a private home and those facilities normally available for research work in a Record Office cannot be provided there at present. [This paragraph remains here (highlighted) in order to maintain the integrity of the original catalogue. Although there are still some restricted documents, access is granted wherever possible. Researchers should contact Arundel Castle Archives (see the website) and not the County Archivist, to arrange their visits.]

Although the Arundel archives are administered by the County Archivist of West Sussex, through the County Records Committee, they are the property of His Grace The Duke of Norfolk, E.M., K.G., P.C., G.C.V.O., and acknowledgment must be made to him if any of them are quoted in printed works or theses. Each group of archives in this handlist is prefaced by a class letter (e.g., AY, for Aylward Papers) which should precede the reference number of any individual item.

THE AYLWARD PAPERS

1672-1717

Issued by
THE WEST SUSSEX COUNTY COUNCIL
COUNTY HALL, CHICHESTER
1961
THE AYLWARD PAPERS, 1672-1717

The papers in this collection are mainly the business correspondence and accounts of John Aylward, who was a general import and export merchant and banker. His life was spent, as far as we can tell from these papers, almost entirely in Malaga, St. Malo and London. The earliest letters are addressed to him in Malaga, and begin in 1672. In 1687 he moved from Malaga to St. Malo, where he stayed until 1698 except for a short visit to London in the autumn and winter of 1687-8. Aylward finally moved to London in 1698, and remained there until his death on May 5th, 1705.

John Aylward, originally of Waterford in Ireland, was probably the son of that John Aylward of Faithlegg, Co. Waterford, whom Burke's Landed Gentry for 1849 describes as having lost all his possessions in the Civil War. The latter's son, Peter Aylward, is said to have married Ann Butler, and as letters survive in the collection from several members of the Butler family, it seems like that a relationship existed between John Aylward and the family of that name at Waterford.

John Aylward the merchant married Helena Porter, widow of Jacques De La Herse Trublet, and daughter of Matthew Porter, a merchant of Cadiz and St. Malo. Their daughter Mary married Henry Charles Howard of Greystoke, and was the mother of Charles Howard who in 1777 became 10th Duke of Norfolk.

A few personal letters are included in the collection, but by far the greater number deal with Aylward's business interests, which seem to have been many and various; embracing, among others, such different commodities as baize, herrings, stockings, lemons and wine. His trade was with Spain, Italy, the Low Countries, France and England, and the series of letters is remarkably complete.

THE FITZALAN CHAPEL CASE

The principal sources for the history of the collegiate church of the Holy Trinity, Arundel, and a description of its buildings and monuments are:

M. A. Tierney, 'Notices connected with a recent excavation in the College Chapel at Arundel', in *Sussex Archaeological Collections*, vol. 3 (1850), pp. 77-88.

Having survived the dissolution of the monasteries [chantries], the college and its possessions were conveyed to Henry Fitzalan, Earl of Arundel (1512—1579/80), on 26 December, 1544. The choir of what is now the parish church of St. Nicholas, Arundel, was the chapel of the college but the two parts of the building are quite distinct, the arch at the west end of the choir (between it and the original nave) being blocked on the east side; on the west side of the arch the medieval iron grille is still in position.

A protracted law suit (The Duke of Norfolk v. The Rev. George Arbuthnot) was heard before Lord Chief Justice Coleridge in March, 1879, to determine whether the eastern arm (known as the Fitzalan Chapel) of the former collegiate church was part of the parish church of Arundel or whether it was the private property of the Dukes of Norfolk. The evidence, gathered from numerous sources and listed below, overwhelmingly proved that the buildings known collectively as the Fitzalan Chapel belonged to the Duke. The Lord Chief Justice's verdict was upheld when the case went to the Court of Appeal in 1880.

The licence by William Rede, Bishop of Chichester, on 24 May 1380 has survived together with an impressive series of account rolls from 1383 to 1551. The two inventories, 1505 and 1517, of the goods of the collegiate church are of great interest, while the papers in connection with the law suit mentioned above comprise historical material which could only be collected again by long and painstaking research.

BOROUGH OF HORSHAM

TITLE-DEEDS TO BURGAGE AND OTHER PROPERTIES
AND RECORDS OF CONTESTED ELECTIONS

Issued by
THE WEST SUSSEX COUNTY COUNCIL
COUNTY HALL, CHICHESTER
1963
BOROUGH OF HORSHAM

TITLE DEEDS TO BURGAGE AND OTHER PROPERTIES AND RECORDS OF CONTESTED ELECTIONS

THE BOROUGH OF HORSHAM

This introduction is intended merely to sketch in a background to the Horsham documents preserved among the Arundel Castle archives; W. Albery, in A Parliamentary History of . . . Horsham 1295-1885 (1927), deals with the subject in great detail.

Horsham has no extant charter of incorporation, but was regarded from early times until the Reform Act of 1832 as a borough by prescription, with the right to send two members to parliament. The privilege of electing these representatives was originally confined to 52 burgesses, the owners of 52 carefully delineated properties within the borough, for each of which an annual rent of one shilling was payable to the Lord Paramount of Horsham (the Duke of Norfolk, as successor to William de Braose to whom the manor was originally granted by William the Conqueror). These 52 burgages constituted the Manor of the Borough of Horsham; their owners held as mesne lords of the Lord Paramount and were admitted burgesses at his private Court Baron, over which his steward presided.

The 52 burgesses also formed the corporation of the borough, and provided the officers of the court leet, a court of record which had originally both civil and criminal jurisdiction over every male above 12 years of age who had lived in the borough for a year and a day. The court leet jury, which consisted of not less than 13 and not more than 23 burgesses, annually nominated four burgesses from whom two were chosen by the Lord's steward as bailiffs of the town; these bailiffs occupied the position normally held by a mayor; among other duties they presided at town meetings (other than the court leet where the Lord's steward officiated), collected and paid over burgage rents, and acted as returning officers at the parliamentary elections.

The importance of the burgage holdings grew with the town; by 1686 the 52 original burgages and consequently votes, had, by judicious division of the properties, been increased to 68; but the splitting of votes was officially ended by the Splitting Act of 1696 (7 & 8 Wm. III, c.25). The burgess roll became the most jealously guarded document in the town, as until a burgage-holder had had his name inscribed upon it at the Court Baron he was not eligible to act or vote, even though he could prove title to his property.

The first contested election in Horsham was that of 1701, and from the poll it seems that the burgesses were still mainly independent and resident, although they were much courted by the rival factions. This election saw the beginning of the corrupt practices which were to become a feature of the Horsham elections until the town lost its borough status; the defeated candidate petitioned the House of Commons, alleging bribery and corruption, but the petition was never heard owing to the death of William III, and at the general election the following year there were only two candidates.
The 18th century saw the subjection of the borough to various family and party interests, and the independence of the burgesses was completely lost. Burgages were bought, sold and fraudulently conveyed and divided in complete disregard of the Splitting Act; persons tendering to vote were often entirely ignorant of the whereabouts of their burgage property as their supposed interest amounted only to a signature on a deed.

Charles Eversfield of Denne Park, who became steward of both the Horsham courts, had a great influence in the early part of the century; he was opposed, in the Whig interest, by the Ingram family, who acquired power at Horsham when, on the death of John Machell of Hills in 1704, his property came to his grandson Richard Ingram, second son of Arthur, 3rd Viscount Irwin. In 1737 the 7th Viscount Irwin captured the Eversfield interest, and from then on proceeded to buy up burgages whenever possible; Lord Irwin’s steward, Edward Dickenson, gained possession of the borough records, and annotated and altered them as he thought fit. The Lord Paramount took little interest in the borough, the Court Baron was rarely held, and rents were not collected. In fact, so complete did the Irwin family’s hold on the borough become, that from 1715 to 1790 there was no contested election.

In 1786, Charles, 10th Duke of Norfolk, Lord Paramount of the borough, died, and was succeeded by a young and energetic heir. The new Duke, another Charles, and his steward, Thomas Charles Medwin, decided to revive the Norfolk influence in Horsham. Medwin, a solicitor who practised in the town, was able to acquire inside information about the Irwin burgages, now held by Frances, widow of the 9th Viscount Irwin who had died without issue in 1778. He informed the Duke that Lady Irwin’s title to a number of burgages would be difficult to prove and that a large number of her burgesses had never been admitted at the Court Baron. There were still about 30 independent voters left in the borough. The Duke began to buy burgages, which were conveyed to Medwin and to Robert Henry Hurst, in trust for him. The Duke concentrated on acquiring whole burgages—relying on the Splitting Act to invalidate votes claimed for Lady Irwin’s incomplete holdings.

The first election after the Duke renewed his interest was in 1790. Many of Lady Irwin’s burgesses had not yet been admitted and Medwin took care not to call the Court Baron until the last minute, so that there was not time for the burgage roll to be brought up to date.

Various actions at law were begun by each side to test the validity of votes, mainly in causes *quo warranto* the defendants claimed to be burgesses. There were nine actions altogether, and documents relating to four of them have survived.

At the election the Duke’s candidates were seated but on a petition to the House of Commons the decision was reversed, mainly on the grounds that the Committee which had decided in 1715 on an earlier contested election had agreed that the franchise belonged to all persons having an estate in burgage properties in Horsham, and not only to those owning whole burgages, and that a burgess did not necessarily have to have his name on the burgess roll in order to be entitled to vote, as long as his title was in order. The stipulation for only ‘an estate’ in burgage property was regarded as making Horsham not purely a burgage tenure borough, and so not subject to the provisions of the Splitting Act.
At this reverse, the Duke retired from the lists, and put up no candidates at general or by-elections until 1806.

At this election, however, he once more entered the field, and acting upon the decision of the previous Committee which had seated Lady Irwin's candidates on a majority of split burgages, began dividing his holdings to make as many votes as possible.

In 1806, the bailiffs declared the Duke's candidates elected, but as Lady Irwin's agents demurred on the grounds that she had a majority of whole burgages, a double return was made, leaving the onus of decision to the House of Commons; the Committee found for the Duke's candidates. The following year, after another general election, the bailiffs, acting on the Parliamentary Committee's decision, having returned the Duke's candidates, another Committee reversed the decision and seated the Whig candidates, basing their findings on a new postulation, that the rent on each property must have been duly apportioned in the conveyance for the vote to be valid; the Irwin candidates had more supporters who could prove such apportionment, and so the Duke's nominees were unseated.

Lady Irwin died before this final decision in her favour, and her Horsham property passed to Francis, 2nd Marquess of Hertford who had married the eldest of her five daughters, Isabella.

In 1811, the Marquess of Hertford with the consent of Lady Irwin's other heirs, finally conveyed the property to Charles, 11th Duke of Norfolk, for a total of over £90,000. This gave the Duke virtually complete authority over the borough; his holdings in Horsham were further increased when Horsham Common was inclosed, and he received the lion's share of the land as both lord of the manor and the holder of most burgages.

The Reform Act of 1832 enlarged the constituency borough, and burgage tenements ceased to have any importance; political jobbery was not, however, to end at Horsham until the Ballot Act of 1872 and the various Representation of the People Acts made illegal persuasion of voters both impracticable and pointless.

**The Records**

The Horsham records in this collection consist mainly of title-deeds to burgages and of documents relating to the petitions on the elections of 1790, 1806 and 1807. A few records arising from the 1715 petition and from the inclosure of Horsham Common have survived, and one or two other miscellaneous documents relating to the town have also been placed with the main collection.

**Title-Deeds**

The fullest description of the burgage property in Horsham is given in the conveyance of 1816 from the trustees of the late [Charles 11th] Duke of Norfolk, to Bernard Edward [12th] Duke of Norfolk, and this deed has therefore been calendared in full [H015], together with such earlier conveyances [HO 1-13] of the bulk of the borough property as explain
the descent of the borough and add to or vary the descriptions of properties in the
1816 deed. Cross-references have been made where possible, but although in
most cases variations of description are only slight, the identification of one or two
properties listed in HO 15 with those described, particularly, in H04, has to be
conjectural, the abuttals being similar, but tenants’ names quite different (e.g.
compare H015/xxi and HO 4/xxxiv). It seems probable that so many fraudulent
conveyances were made, that when a basic transfer of title was necessary, the
true description of a property was difficult to distinguish from the garbled version
given in many of the individual deeds. The spelling of the names of individual
properties also varies considerably.

The documents numbered H016-2030 are deeds in respect of single burgage
tenements, and those from H02031-2175, with three exceptions, relate to
properties in Horsham to which no vote was attached. H02165, 2166, 2167 are
two fraudulent burgage conveyances;1 and a deed of an unidentified property
which may or may not be a burgage. H02176-2182 consist of miscellaneous
documents and wills which have probably strayed from the bundles of burgage
deeds, but which it has proved impossible to replace. H02183-2203 are
miscellaneous abstracts of title and draft conveyances of burgages, and other
documents, found with the deeds but bearing no direct relation to them.

The second main group of documents, H02204-2375, arises from the three
petitions to parliament in 1792, 1807 and 1808. These have been extremely
difficult to list as earlier documents produced as evidence have been stored with
the contemporary records of the petitions. The borough court books and the
original survey of 1611 from which most of the burgage tenements were basically
identified have been placed at the beginning of this group. These documents were
in such complete disorder that it was found more satisfactory to preserve original
bundles as far as possible and list the documents in chronological order. This is
not an ideal solution, and in the fullness of time it may prove possible to
reconstitute the original bundles.

The final group of documents, H02376-2397, are a miscellaneous collection
dating from after the hearing of the last election petition in 1808.

PHYSICAL CONDITION OF THE RECORDS

The petition records have suffered most from damp storage conditions in the
past although they have been preserved in their original bundles. A small
number disintegrated at a touch and would have been quite beyond repair.
Luckily, however, many of these were duplicates and no original document of any
importance has been lost in this way.

At some time the deeds of the individual burgages were allowed to fall into
complete disorder, but they have, as far as possible, been re-sorted into
properties. Some of these deeds, though they are on the whole better preserved
than the petition records, are in a fragile state, and need careful handling.

HORSHAM TOPOGRAPHY

Carfax: Originally included what is now Springfield road.

South Street: Included the Causeway.

East Street: Included Denne Road, though burgages there are sometimes described as "near the East Street in the lane leading to Cobbett's Bridge".

North and, West Streets: As today.

Park Street: Appears in deeds as the Back Lane or Friday Lane. The junction of East Street and Denne Road was sometimes known as Wicken's Cross, and that of West Street and Worthing Road as Lynd Cross. The north-west corner of the Market Place was Bull Place and the north-east corner was Gaol Green.

Some confusion may arise in respect of the various gaols at Horsham. Before the building of the County Gaol in 1775, at least three other properties had served as gaols in Horsham. The earliest known, for which no deeds survive, was in North Street, opposite the George inn. The other two, both burgage tenements, were in Carfax at the north side of the Market Place. The building known as the "Old Gaol and Outlett" was on the corner of Carfax and North Street (H0735-752); this ceased to be used as a gaol about 1640, and was replaced by a neighbouring burgage, "Ockledens" (?Ockendens](H0677-701). This property was known as the gaol or the new gaol until it was superseded by the newly built County Gaol, and from then on it also appears in deeds as the old gaol, a fact that has caused confusion in the titles to both properties in the past.

THE INGRAM RECORDS AT TEMPLE NEWSAM, CO. YORKS.

A few deeds and documents relating to Horsham (TN/HMI-41) have been preserved among the archives at Temple Newsam. The Temple Newsam collection is now on deposit at Leeds City Library, and the relevant portion of the catalogue is available in the West Sussex Record Office (Misc. Papers 170).

There is some confusion between this property and Ockledens (H0677-701), also called the Old Gaol. It is unlikely that they are the same because Ockledens was used as the gaol until the mid 18th century, whereas this property ceased to be so used before 1700. 18 docs., 1659-1831.

The property was, at some point (probably between 1682 and 1721 when there is a gap in the deeds), divided into two parts, so the documents are arranged—
(a) Those of the George inn as a whole, 1555-1682 (H0864-881).
(b) Curtis's part of the George inn, 1721-1792 (H0882-901).

The earlier deeds refer to a messuage in two tenements and Nyes was the southernmost of these. The deeds of the northern half, usually described as now or late in the occupation of Richard Curtis, are missing, but this portion of the house may be identical with Curtis's part of the George inn (see H0882-901). These deeds have been resorted as there was confusion at an early date between this property and George Holmes' house south of the Chequers.

46 docs., 1620-1812.

166 docs., 1663-1816.

1175-1211 Title-deeds of George Holmes' house alias Bookers in North Street; see H015(xxiv).

There was confusion from an early date between this property and that to the north of the Chequers inn, also sometimes called Bookers, but the deeds of the latter property have been removed and are now listed as H0963-1008 above. Two small original bundles of deeds, 1623/4 and 1678-1681 (H01175-1178 and 1179-1181), which probably relate to the same property, have been added to the bundle though the connecting documents are missing; the later group consists of a judgment in a testamentary dispute, Booker v. Title-deeds of Broadbridges in East Street; see H04(xx) and H015(xxix). 35 docs., 1691-1816.

The messuage and the orchard adjoining were separately conveyed, but as the house was presumably demolished shortly after 1721, the distinction between its site and the orchard is not obvious; both sets of deeds, by no means complete, simply refer to 'a piece of ground'. The copy deeds, 1721 (H01396, 1397) relate also to:

(a) The manor of Sullington.
(b) Farm (50a.) in West Chiltington in occ. of Thomas Stedman.
(c) House in South Street, Horsham, in possession of George Arnold.
(d) Messuage, shop, etc. near the Market Place, Horsham, in the tenure of Sir Harry Goring.

burgages, but it seems more likely that the original six referred to were comprised in Grace's tenement on the corner (2 burgages) (see H01371-1393) Broadbridges (see H01394-1428), Potters Croft (see HO 1429-1474), Rowlands and Pollards Croft alias the Watering Pond Field (conveyed with Rowlands in early deeds (see H0468-483). (d) barn, hovel and orchard, part of Gilhams. 8 docs., 1738-1790.

All the above are at times separately conveyed as part of Gilhams. From 1793 the faggot conveyances (H01574-1581) relate to the entire property. No. HO 1554 also relates to (a) and to Elliotts and Patchings; no. HO 1564 refers to the Rackfield (Hollands Croft, see below) in addition to the properties listed in (c). (Hollands Croft is also here called alias Schoolhouse Croft). No. HO 1622 refers only to the five crofts. Nos. HO 1623-1625 refer to Hollands Croft alias the Rackfield, Gilhams, and the tithes of Bulverhythe near Hastings.

¹ Probably the holdings shown in W. Albery, A Parliamentary History of . . . Horsham (1927), p. 19, as Daniels and Parkhursts with Foreman's and Foyce's between. It is more likely that the last-named was south of Parkhursts and identifiable with part of Hadmans (see H01814-1840).

EARLDOM OF NORFOLK

The title of Earl of Norfolk had been conferred on Thomas de Brotherton one of the sons of King Edward I in 1312, but on Thomas's death in 1338 the Earldom reverted to and was in the disposal of the Crown where it remained until it was granted by Letters Patent, 6 June 1644, to Thomas Howard, Earl of Arundel and Surrey (1585-1646). The title of Earl of Norfolk granted by this Patent in 1644 was borne by Thomas Howard's son and heir, Henry Frederick Howard, and also by his grandson Thomas Howard, who by Acts of Parliament in 1660 and 1661 was restored to the title of Duke of Norfolk. From this date the Dukes of Norfolk have also borne the title of Earl of Norfolk.

By Resolution of the House of Lords dated 25 June 1901, it was decided that the Duke of Norfolk should not be required to prove that he is the rightful holder of the said Earldom.

1 See 'The Aylward Papers, 1672-1717' (Arundel Castle Archives, Interim Hand list No. 1).

The case of Lord Mowbray, Segrave, and Stourton was that at the date of Patent, 6 June 1644, the Earldom of Norfolk was not wholly in the disposal of the King, but was in abeyance. Lord Stourton was descended from Philip Howard of Buckenham, Norfolk (1688-1750) and his first wife Winifrede, daughter of Thomas Stonor. The case was a very involved one and raised a question of peerage law with respect to the devolution of the dignity of an English earldom which was new and important.

In 1906 the Committee for Privileges heard the case brought by Lord Mowbray who challenged the Duke of Norfolk’s right to the Earldom.

The records listed below comprise large quantities of transcripts and translations of public and other records, as well as pedigrees, precedents and the minutes of evidence given before the Committee for Privileges.

THE TALBOT PAPERS

This group of documents is so called, for convenience, because they were found in one box bearing a temporary marking, Talbot Papers'. Bertram Arthur Talbot, 17th Earl of Shrewsbury (1832-1856) died unmarried and devised all the family estates to Lord Edmund Bernard Howard, third son of the 14th Duke of Norfolk, with remainder to His Grace's younger sons, and to his (the Duke's) brother, Lord Edward George Howard (created Baron Howard of Glossop in 1869) who married the late Earl's cousin, Augusta, daughter of the Hon. George Henry Talbot in 1851. Lord Edmund Howard, born in 1855, assumed the name of Talbot only by Royal licence, 19 July 1876, was created Viscount Fitzalan of Derwent on 28 April 1921, resumed his paternal name of Fitzalan-H Howard by a further Royal licence, 9 June 1921,1 and died in 1947.

There were, however, much earlier connections between the Howard and Talbot families. Thomas Howard (1558 [1585]-1646), Earl of Arundel, Surrey and Norfolk, married, in 1606, Alathea, third daughter and coheir, but eventually sole heir, of Gilbert Talbot, 7th Earl of Shrewsbury; she died in 1654. Still earlier was the marriage of John de Mowbray, Duke of Norfolk (1444-1475/6) and Elizabeth, daughter of John Talbot, 1st Earl of Shrewsbury. Archives stemming from these alliances are also in the collections at Arundel.

The archives listed below on pp. 180-198 probably do not represent all that were received after the death of the 17th Earl of Shrewsbury; any others will be either the subject of a supplement to this handlist or be merged with other groups and identified through references in the general index to persons and places. Further groups of the Shrewsbury archives are in Lambeth Palace Library and Sheffield Public Library.

All the more important maps are described in some detail between pp. 67 and 95 (Interim Handlist No. 6), but for the sake of completeness most are cross-referenced to this list2 in which the less important maps have been noted. The maps and survey books form a valuable series but it is a cause for some regret that the names of many of the surveyors are unknown and that a number of the maps are copies or drafts.

[Information from Jonathan Pepler, Nov. 2004, Archivist, Cheshire Record Office, that the British Library has a book of reference to their sets of these Talbot Maps, which may be the key to our maps]

2 Only three are omitted: they were found apart from the main group and are:— Little Neston and Raby, co. Cheshire, 1794. Arundel Castle MS. P5/38 (Handlist, p. 69) Oxton, co. Cheshire, 1795. CORRESPONDENCE OF Henry, 15th Duke of Norfolk, 1847-1917
This extensive correspondence, amounting to several thousand letters and occupying 245 cubic feet of storage space, has been arranged chronologically under months (but not in date order within any month) and is now filed flat between sheets of cardboard.
The letters cover every aspect of the Duke's life and interests—religious, personal, political, estate administration, military, charitable works and building—and, except for a few years, is probably complete. He saved, and usually endorsed, almost everything. There are some invoices (mainly for the purchase of antiques), monthly statements of bank balances, and documents dealing with estate and trust matters but linked with the correspondence and as such ought not to be separated. There are a few copies or drafts of letters written by the Duke and a small number of letters not addressed to him but included in the main series because they are either related or he dealt with them. All the correspondence concerning the office of Earl Marshal has been removed and listed separately. A proportion of the letters was sorted in 1935 but this work was of no practical value and none of the brief typed lists which were with some of the bundles have been saved.
The letters will form a valuable source for any biography of the 15th Duke, but they are not at present accessible to readers.
